

# **HOBBIT Benchmarking Platform**

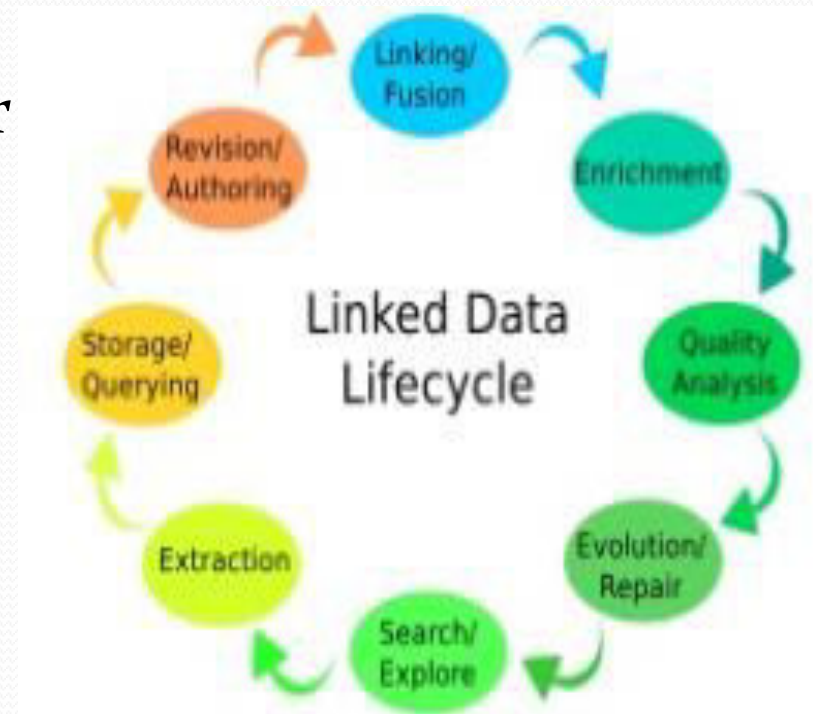

Rutuja Suryawanshi

# Overview

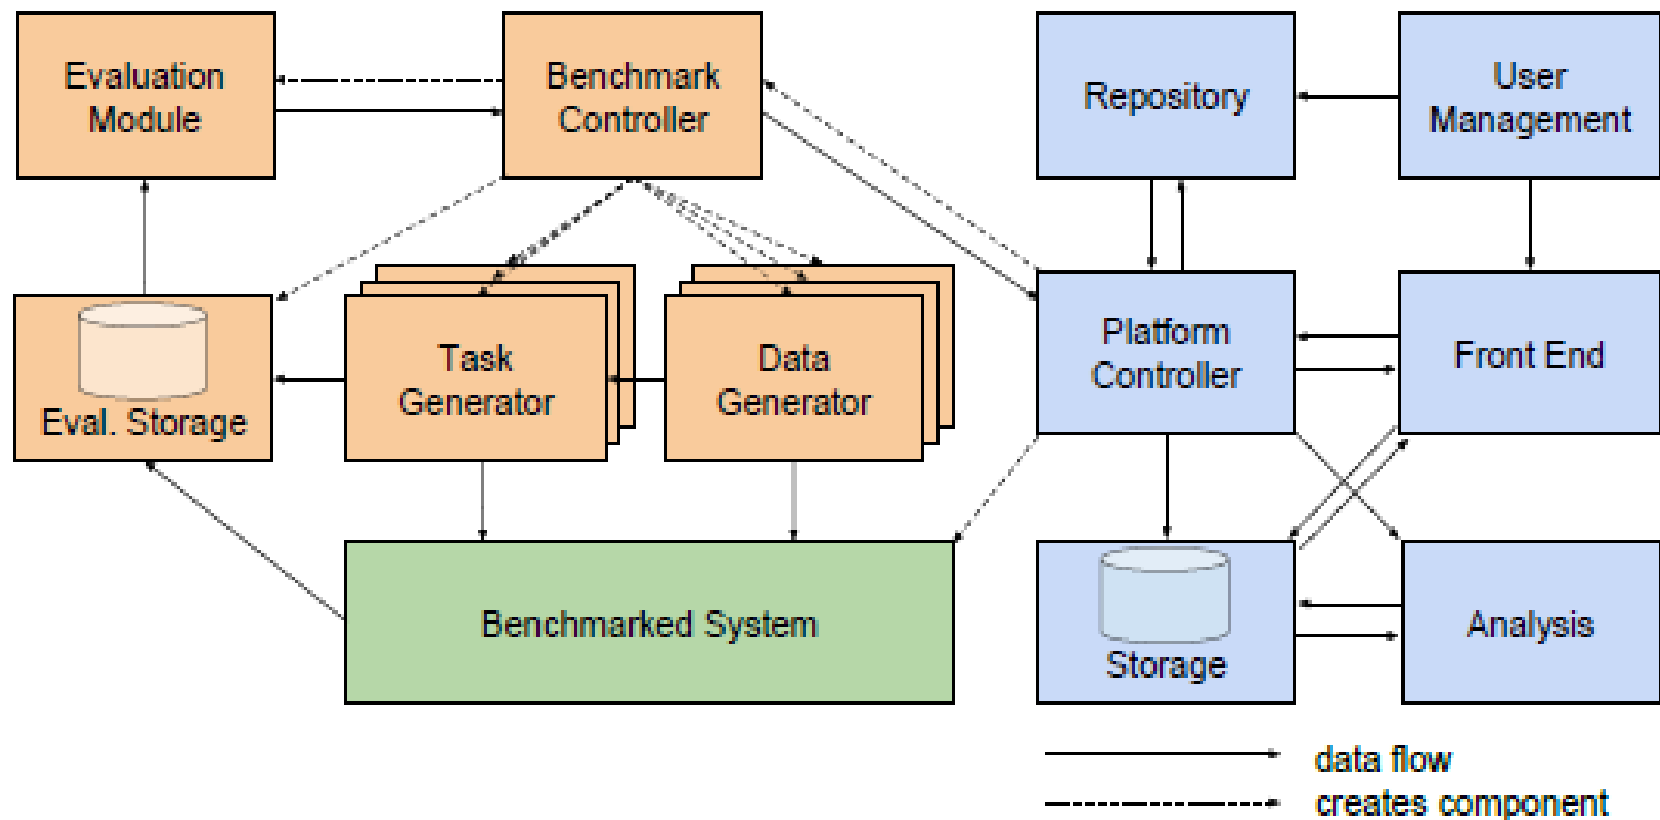

1. Introduction to HOBBIT
2. Architecture Overview
3. Benchmark workflow
4. Features

# Introduction

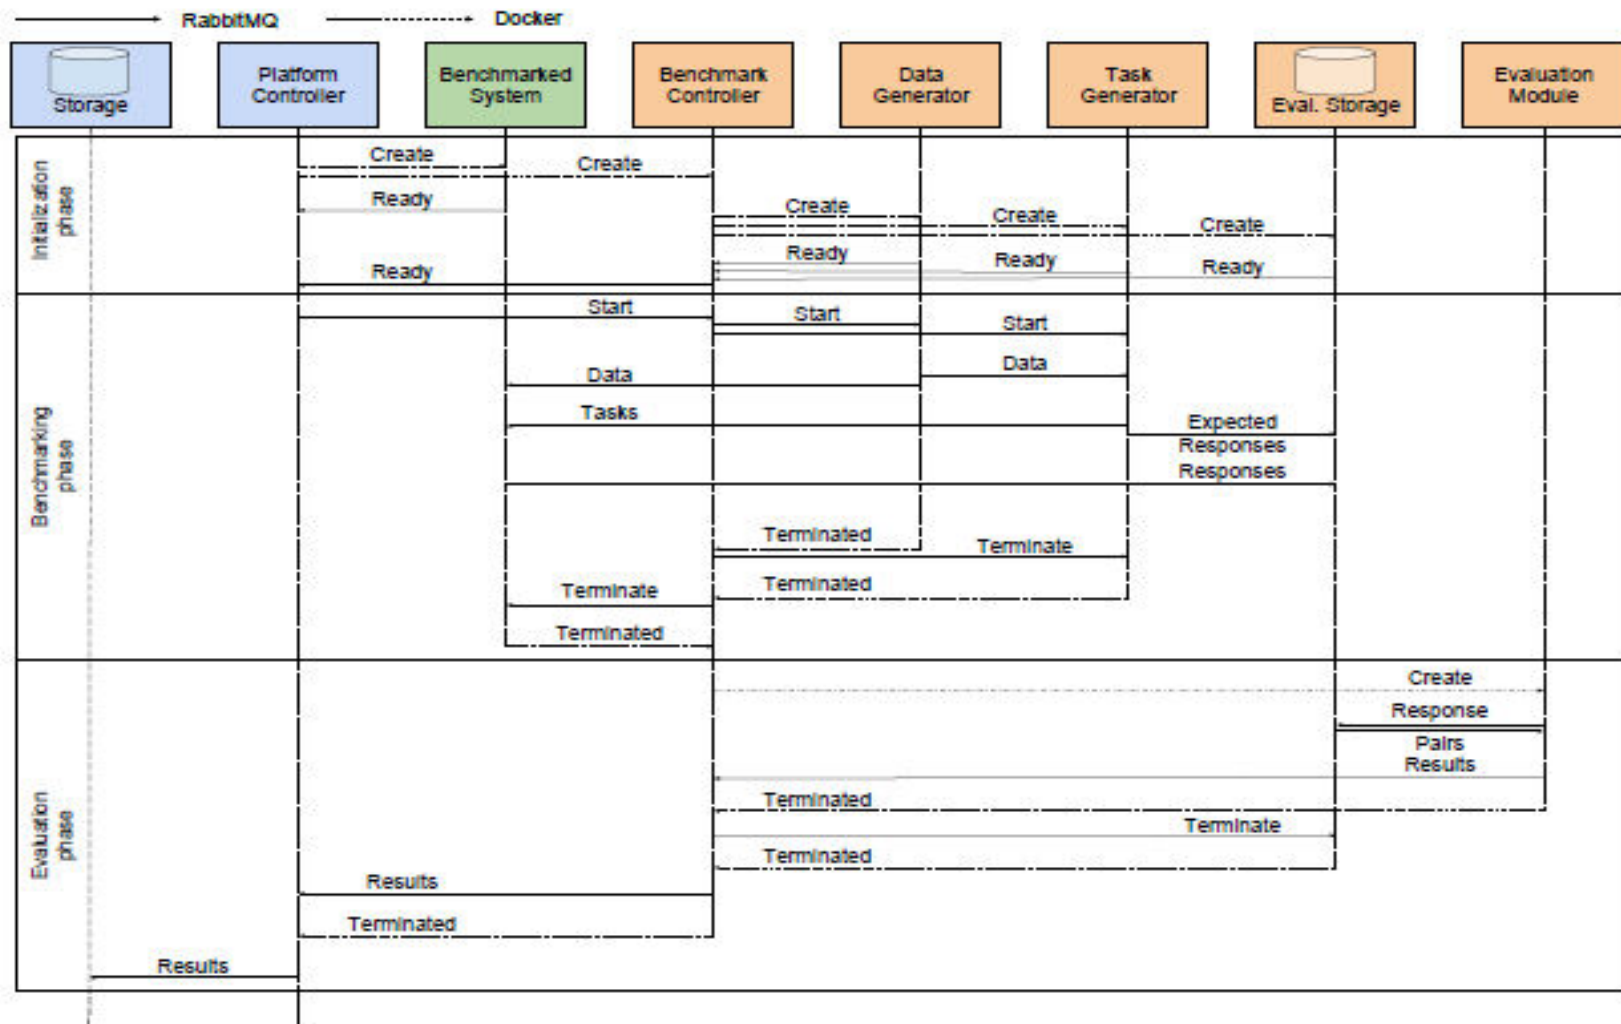

- A benchmarking platform for Big data.
- cover all steps of Big linked data Lifecycle.
- designed to accommodate all Big data
- Developed benchmarks are based on real data

# Architecture

# Benchmarking workflow

# Features

- Modular and easy to scale up.
- First benchmarking platform for benchmarking Big Linked Data systems.
- New benchmarks can be easily created and added
- Used to measure both the scalability and accuracy
- well suited for benchmarking any step of the Big Linked Data life cycle.

Thank You !
